Signs and symptoms of substance use disorders

Behavioral changes, such as:

- Drop in attendance and performance at work or school
- Frequently getting into trouble (fights, accidents, illegal activities)
- Using substances in physically hazardous situations, such as while driving or operating a machine
- Engaging in secretive or suspicious behaviors
- Changes in appetite or sleep patterns
- Unexplained change in personality or attitude
- Sudden mood swings, irritability, or angry outbursts
- Periods of unusual hyperactivity, agitation, or giddiness
- Lack of motivation
- Appearing fearful, anxious, or paranoid, with no reason

Physical changes, such as:

- Bloodshot eyes and abnormally sized pupils
- Sudden weight loss or weight gain
- Deterioration of physical appearance
- Unusual smells on breath, body, or clothing
- Tremors, slurred speech, or impaired coordination

Social changes, such as:

- Sudden change in friends, favorite hangouts, and hobbies
- Legal problems related to substance use
- Unexplained need for money or financial problems
- Using substances even though it causes problems in relationships

Early warning signs for mental health disorders

- Eating or sleeping too much or too little
- Pulling away from people and usual activities
- Having low or no energy
- Feeling numb or like nothing matters
- Having unexplained aches and pains
- Feeling helpless or hopeless
- Smoking, drinking, or doing drugs more than usual
- Feeling unusually confused, forgetful, on edge, angry, upset, worried, or scared
- Yelling or fighting with family or friends
- Experiencing severe mood swings that cause problems in relationships
- Having persistent thoughts and memories you can't get out of your head
- Hearing voices or believing things that are not true
- Thinking of harming yourself or others
- Inability to perform daily tasks like taking care of your kids or getting to work or school
